-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 26 February 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

5. Claims 1-31 are rejected under 35 U.S.C. 102(a) as anticipated by Holdrege et al Holdrege et al [Media Gateway Control Protocol, version 1.0, Aug 1999]
6. As per claim 1, Holdrege discloses a media gateway, a method of identifying a connection for a call, the method comprising the steps of:
  - receiving a command (i.e.: request) from an associated media gateway controller to establish the connection for the call [Holdrege, Media Gateway Controller connection establishment, page 1-2];
  - determining a value for an end-to-end call identifier (EECID) [Holdrege, end-to-end AAL2 connection identifier, page 3];
  - sending the EECID to the associated media gateway controller [Holdrege, an ATM gateway MGC, page 3] ;

establishing the connection for the call with the far-end media gateway so that the EECID is associated with the connection and the call [Holdrege, local Media gateway and remote Media gateway]; and

notifying the associated media gateway controller that the connection has been established [Holdrege, notified by the Media gateway controller (MGC.), pages 4-5]

7. As per claims 2,8,13,20 Holdrege discloses the value of the EECID is a randomly generated number as inherent feature of Media Gateway.

8. As per claims 3,9,11,14,21 Holdrege discloses the value of the EECID is the same as that of a network call correlation identifier [Holdrege, end-to-end AAL2 connection identifier, page 3].

9. As per claims 6,17,24 Holdrege discloses the notification to establish a connection is an off-hook notification as inherent feature of notification [Holdrege, notified by the MGC, page 4].

10. As per claims 7,18,25 Holdrege discloses the notification to establish a connection is a request to negotiate parameters, the request being received from the far-end media gateway controller [Holdrege, negotiated, page 3].

11. Claims 5,12,16,19,23,26-31 contain the similar limitations set forth of method claim 1. Therefore, claims 5,12,16,19,23,26-31 are rejected for the similar rationale set forth in claim 1.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

12. Claims 4,10,15,22 are rejected under 35 U.S.C. § 103 as being unpatentable over Holdrege et al Holdrege et al [Media Gateway Control Protocol, version 1.0, Aug 1999] in view of Kline et al [Kline 5,812,527].

13. As per claims 4,10,15,22 Holdrege does not detail the forward connection Identifier (i.e.: the value of the EECID) is the same as that of a backward network connection identifier.

It was well-known in the art that the forward and backward directions of an ABR VC use the same connection identifiers [Kline, col 7 lines 45-67].

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate the technique of using the forward connection ID or EECID is the same as that of a backward connection ID as taught by Kline into the Holdrege's apparatus in order to utilize the EECID. Doing so would provide a simple and reliability to control the end-to-end connection over multimedia network
